KNOWLEDGE PORTAL on innovation and access to medicines

A one-stop source providing open access information, research and analysis on policies relating to pharmaceutical innovation and access. Topics are organized under three interrelated themes: Pricing, Intellectual Property and Innovation. Resources include: research syntheses on a range of topics, data sources, webinars and a list of research gaps.

The Knowledge Portal aims to make existing knowledge more available and accessible to communities of policy & practice as a tool to achieve needs-driven innovation and globally-equitable access to medicines.

RESEARCH SYNTHESSES**

The research syntheses aim to provide concise, comprehensive overviews of the current state of research on a specific topic. Topics may be listed under more than one theme.

Pricing

- Affordability**
- Biologics-Biosimilars Regulation***
- Competition Law**
- Donation**
- Health Technology Assessment**
- Institutions**
- Mark-ups & Taxes in Supply Chain**
- Parallel Import**
- Pooled Procurement**
- Price Controls/Regulation**
- Shortages**
- Tiered Pricing**
- Voluntary Licencing**

Intellectual Property

- Competition Law**
- Data Exclusivity***
- Compulsory Licencing***
- Parallel Import**
- Patentability criteria***
- Patent Pools**
- Shortages**
- TRIPS-Plus / Trade Agreements***
- Voluntary Licencing**

*Work in Progress

Innovation

- Advance Market Commitment**
- Cost of R&D***
- Drug Development Histories***
- Patent Pools**
- Priority Review Voucher**
- Product Development Partnerships**
- Priority-setting for R&D***
- Private funding of R&D***
- Productivity of R&D***
- Public Funding of R&D**
- University Licencing***

****Disclaimer:** The research syntheses aim to provide a concise, comprehensive overview of the current state of research on a specific topic. They seek to cover the main studies in the academic and grey literature, but are not systematic reviews capturing all published studies on a topic. As with any research synthesis, they also reflect the judgments of the researchers. The length and detail vary by topic. Each synthesis will undergo open peer review, and be updated periodically based on feedback received on important missing studies and/or new research. Selected topics focus on national and international-level policies, while recognizing that other determinants of access operate at sub-national level. Work is ongoing on additional topics. We welcome suggestions on the current syntheses and/or on new topics to cover.

ABOUT US

The Knowledge Network on Innovation and Access to Medicines is a project of the Global Health Centre at the Graduate Institute, Geneva. The project seeks to maximize the contributions of research and analysis to producing public health needs-driven innovation and globally-equitable access to medicines.
